

## Phonology Exercise 2

1. Provide examples of two words of four or more syllables illustrating each type of foot: trochee, iamb, and dactyl. One word may contain one or two different foot types. Provide trees illustrating all the structure up to the level of Phonological Word (PW).
2. Provide five examples of words with 'stray' syllables showing the tree structure for one case.
3. Draw tree structures to show the stress pattern of the words *bargain*, *release*, *cinema*, and *America*. Explain the differences.
